## CHOOSE AN AAPS SECTION - Required Field

Your AAPS Membership includes two section affiliations; there is a \$5.00 fee for each additional section.

- Analysis and Pharmaceutical Quality (AP)**— provides a forum for the exchange of information pertaining to analytical techniques, regulatory and compendial issues, and assurance of quality.
- Biotechnology (BT)**— enables individuals from multiple scientific disciplines to address issues, share information and experimental findings, and provide education for research, development and commercialization of new biopharmaceuticals.
- Clinical Pharmacology and Translational Research (CP)**— provides the clinical research dimension within the comprehensive range of pharmaceutical sciences and is concerned with issues related to the clinical use of pharmaceuticals.
- Drug Design and Discovery (DD)**— encourages the generation of knowledge concerning the chemistry, biochemistry, and pharmacological actions of synthetic and naturally occurring medicinal agents.
- Formulation Design and Development (FD)**— unites multiple scientific disciplines in order to share experimental results, consider new formulation and dosage form technologies, and discuss issues and concerns regarding the design and development of formulations/drug products for small molecules.
- Manufacturing Science and Engineering (MS)**— composed of scientists and engineers interested and involved in the application and advancement of science and technology to the manufacture of pharmaceutical and pharmaceutically related products.
- Pharmacokinetics, Pharmacodynamics and Drug Metabolism (PP)**— provides a forum to examine issues related to the biopharmaceutics, pharmacokinetics, pharmacodynamics, drug metabolism and transport of pharmaceutical products and therapies.
- Physical Pharmacy and Biopharmaceutics (PB)**— focuses on a quantitative understanding of the intrinsic properties of the small drug molecule and the interacting biological system, enabling the selection of developable drug candidates and the identification of potential strategies for optimal drug delivery.
- Regulatory Sciences (RS)**— analyzes information on product performance, addresses issues regarding drug law and resultant regulations, and promotes science-based regulations to help drug regulatory agencies protect public health and safety.
